## **Petition**

To The Legislative Assembly of Ontario:

## **WHEREAS**

HPV vaccination is an essential tool in cancer prevention. Ontario lags behind in HPV vaccination rates and is 1 of 4 provinces to not provide coverage for the vaccine broadly to adults. With a high financial barrier for adults to get the full vaccination course, many Ontarians are go without the HPV vaccine leading to about 1300 cases of HPV related cancers in Ontario yearly. 90% of these cases of cancer can be prevented through proper vaccination.

We the undersigned petition the Legislative Assembly of Ontario as follows: to expand OHIP coverage to allow all adults under 26 to get vaccinated for free, as vaccinating all genders is the most effective way to prevent cancers.
